**WEDNESDAY, MAY 15 AT 12:00 NOON IN BOARDROOM B**

THE TERRACE | 10 RESEARCH DRIVE | REGINA  
LUNCH AND REFRESHMENTS WILL BE PROVIDED

The WSC is a solar energy co-operative with the mission to sustainably build, invest in, own and operate solar power generation projects in Regina and across Saskatchewan through a co-operative community model and to create a better understanding of solar power through education and advocacy.

The WSC has been working together with local residents over the last two years to reduce installation costs with our Group Buy. We also install large scale projects and sell shares of the project to individuals. We are currently underway with our first large installation on top of the Conexus branch on Albert Street.

Andrew Tait is an experienced consultant with a demonstrated history of working in the construction, architecture and planning industry. His skill set ranges from marketing management to business planning to coaching to entrepreneurship and beyond.

Paul Levasseur is a Journeyman Carpenter. He has been a carpenter for 10 years and runs a construction business in Regina. He has taken a solar installation course and has hands on experience installing solar panels.
